

BookableWorld

THE CONNECTED STAY

FOR MID-SIZE HOTELS

Connect your front desk, kitchen and back office.

One connected toolset for every department — and a guest experience that drives real ancillary revenue.

Rooms

Dining

Experiences

Loyalty

Croatian compliance

A single platform for hotels, their guests, and the local partners that make a stay memorable.

Everything from check-in to check-out, connected

BookableWorld links your guests, your team and the best local partners in one system that updates in real time — so nothing falls through the cracks and every stay runs smoothly. Whatever your size, you get the whole platform.

For your guests

- Search and book one or several rooms in a single reservation, with the exact stay total shown before they confirm
- In-room dining sent to a chosen room; experiences and restaurants booked against real, live availability
- A scannable digital room key and a tappable timeline of the whole trip
- Day-by-day invoices, optional split into several invoices, payment by card or bank transfer
- Loyalty points earned and redeemed at checkout, tipping, and English / Croatian / German with multi-currency

Front desk & operations

- Phone-in reservations, check-in / check-out, and room, rate and promotion management
- Order room service or book experiences, restaurants and parking on a guest's behalf
- A live kitchen display with delivery tracking and guest messaging
- Per-invoice billing and payments, plus HUB-3A bank-transfer barcodes for Croatian guests
- Reservation notes and comments, luggage-helper and tip tracking, and arrival times

Management & insight

- Rooms, room types, adaptive rates, promotions, VAT and menus configured in one place
- Staff and user management, a daily reservation chart, and general charges such as parking
- Multi-property control with per-hotel time zones, currencies and banking details
- Loyalty programs with tiers and benefits
- BookableWorld Analytics and Loyalty Program Reporting

A local partner network

- Experience and restaurant partners sign up themselves and publish real-time availability
- Bookings reach them with full guest details, and they message guests directly
- Partners connect to your hotel with a single secure, one-time link — no integration project
- Transportation partners coming soon

Built for Croatia

- e-Visitor guest-registration data collected in the guest's profile
- Tourist-tax exemption and reduction categories handled per guest
- HUB-3A (HRVHUB30) 2D payment barcodes for bank-transfer payments
- Fully localised in Croatian, English and German

Run busier operations without the friction

More rooms, more departments, more moving parts. BookableWorld keeps them in sync in real time, so your team spends less time coordinating and more time serving guests.

Every department, in sync

Admin, Front Desk, the live Kitchen display and the guest app share one real-time system. An order, a check-in or a price change is reflected everywhere at once.

Built for complexity

Multi-room and group bookings, per-invoice billing with optional splits, staff assignment and tips, parking and arrival management — handled cleanly, not in side-spreadsheets.

Price smarter, sell more

Adaptive rates, promotions, VAT and multi-currency give you control of revenue, and analytics show what is working day by day.

A revenue-driving guest experience

Curated experiences and restaurants with live availability, loyalty, tipping and a multilingual app turn the stay itself into a source of income.

Live

cross-team sync

Consolidate systems, lift revenue, reduce errors

A connected operation removes duplicated tools and the manual coordination between them.

- ✓ **Retire your software stack** — replace separate booking, kitchen, payment, loyalty and messaging tools and their support contracts.
- ✓ **Higher staff productivity** — on-behalf services, kitchen routing and luggage/tip tracking remove manual coordination.
- ✓ **Smarter pricing** — adaptive rates and promotions help lift occupancy and average rate.
- ✓ **More ancillary revenue** — commission from partner experiences and restaurants booked through your app.
- ✓ **Fewer costly mistakes** — real-time sync removes double-entry and reconciliation errors across departments.
- ✓ **Built-in Croatian compliance** — e-Visitor, tourist tax and HUB-3A barcodes with no add-on software.

Bring BookableWorld to your team

We will map your departments onto one platform and show how a connected operation reduces cost and lifts revenue.
